COMPANY OVERVIEW

Fortress Comm, LLC provides end-to-end communications and technology solutions for government prime contractors, federal and defense programs, and commercial organizations. We connect requirements analysis, solution development, technology procurement, engineering, deployment, testing, documentation, and sustainment into one coordinated delivery model.

Our role is to help partners reduce execution risk, fill technical capability gaps, and deliver secure, resilient, mission-ready solutions.

CORE CAPABILITIES

- **Satellite Communications** - iDirect and Viasat networks, VSAT systems, hubs and teleports, RF/baseband integration, remote connectivity, testing, troubleshooting, and sustainment.
- **Network Infrastructure** - Routing and switching, LAN/WAN, structured cabling and fiber, wireless, voice, data center infrastructure, monitoring, modernization, and operational turnover.
- **IT & Cybersecurity Consulting** - Requirements analysis, environment assessments, secure connectivity planning, technology evaluation, network security integration, documentation, and remediation coordination.
- **Technology Procurement** - Requirements-based product selection, bills of material, multi-vendor sourcing, manufacturer and distributor coordination, lead-time analysis, lifecycle planning, and deployment alignment.
- **Federal & Defense Support** - Capture and proposal support, mobilization, engineering, field deployment, project coordination, testing and acceptance, documentation, surge support, and sustainment.

LEADERSHIP EXPERIENCE

Fortress Comm is led by a communications and technology executive with more than 20 years of progressive experience spanning VSAT field installation, RF troubleshooting, network engineering, solutions integration, professional services, program delivery, and executive leadership.

Experience includes leading multidisciplinary teams of network, systems, RF, baseband, software, and cybersecurity professionals; supporting Army, DHS, USMC, DISA, and other mission-critical environments; managing iDirect and Viasat networks; coordinating multi-vendor technology solutions; and scaling complex infrastructure programs.

Leadership experience reflects the founder's prior professional experience and is not presented as Fortress Comm corporate past performance.

PROGRAM LIFECYCLE SUPPORT

CAPTURE	DESIGN	DELIVER	SUSTAIN
Requirements review, technical approach, proposal support	Architecture, BOM development, product evaluation	Mobilization, sourcing, integration, field execution	Testing, documentation, troubleshooting, lifecycle support

REPRESENTATIVE ENGAGEMENT AREAS

COMMUNICATIONS	INFRASTRUCTURE	MISSION SUPPORT
SATCOM equipment, remote connectivity, voice and collaboration	Routing, switching, wireless, structured cabling, fiber and data centers	Engineering, field services, documentation, troubleshooting and sustainment

WHY FORTRESS COMM

END-TO-END DELIVERY

One partner supporting the lifecycle from early planning through sustainment.

SATCOM + NETWORK INTEGRATION

Experience across the full communications path, from remote terminals to enterprise users and applications.

PRIME-FOCUSED PARTNERSHIP

Professional support aligned to the prime contractor's program structure and customer relationships.

TECHNICAL + EXECUTIVE PERSPECTIVE

Hands-on engineering knowledge combined with program, financial, workforce, and operational leadership.

SCALABLE SUPPORT

Focused expertise for one work package or broader support across a complex, expanding program.
